

CRELUX, part of WuXi AppTec's Research Service Division, is a global provider of structure based drug discovery solutions.

We have been delivering customized and integrated services in drug discovery, X-ray crystallography, protein supply, biophysical analysis and fragment screening, to support small and large molecule, as well as biopharmaceutical drug discovery, for more than a decade. Our mission is to enable our clients to perform their work faster, more efficiently and more successfully. Integrating the comprehensive portfolio of services offered by our parent company WuXi AppTec, CRELUX offers a unique opportunity for our collaborators to accelerate discovery activities.

Role

A new opportunity has arisen for a Senior Research Scientist in Protein Biochemistry to join our growing Protein Expression Team. The successful candidate will manage our protein expression laboratory and provide expertise in the application and optimization of E. coli, insect cell and mammalian expression systems, using shaker flasks and bioreactors.

Responsibilities

- You will manage the protein expression lab
- You will manage the delivery of client projects within the constraints of schedule, scope, features/functionality and budget
- You will provide regular project oversight to project managers
- You will be responsible for documentation of all project related data
- You will maintain a high level technical knowledge of protein expression
- You will contribute to development and maintenance of Crelux standards, processes, and standard methodologies

Required Skills

- German & English language skills
- Biotechnology, Biochemistry, Biology or comparable background and proven scientific experience in application and optimization of E. coli, insect cell and mammalian expression systems
- Experience with state of the art expression techniques and handling multiple projects
- Experience in construct design and purification of mg amounts of high quality protein for biochemical/biophysical assays
- Positive work attitude towards hands on lab work and lab organization
- Experience to efficiently organize protein expression lab
- Ability to effectively communicate on personal and scientific and technical level with customers and colleagues
- Strong organizational skills, self-organized, structured working style
- Flexibility (adjust to client processes and other departments' processes) and team oriented
- Selfmotivated and independent working practice

Employment Type: Full-time
